ABOUT ME

Aspiring Full-Stack developer with a strong foundation in MERN, Django, and Spring Boot based architectures. Proven ability to design and deploy scalable web applications, optimize database interactions, and implement user-centric features. Committed to writing clean, efficient code to solve complex technical challenges.

EDUCATION

Class X (Secondary)

DTEA Moti Bagh School, New Delhi
Percentage: 92%

2021

Senior Secondary

CO-Ed Senior Secondary School, New Delhi
Percentage: 92%

2023

Chaudhary Charan Singh University

Bachelor of Technology (Computer Science Engineering)

2023-2027

INTERNSHIP

Web Development | SkyBrisk | 2025 December - 2026 March

- Developed and deployed full-stack applications using diverse tech stacks, including MERN and Django
- Optimized database query performance and error handling during a professional internship at Skybrisk.
- Engineered reusable frontend components to streamline UI development and improve application consistency

PROJECT

Job Portal Web Application

Nodejs, ExpressJs, MongoDB, Python

- Built a job portal enabling job filtering and application submission
- Implemented a user search feature to optimize candidate discovery for recruiters.
- Implemented a chatbot for doubts

Book Store Management System

MERN Stack (NodeJs, ExpressJs, MongoDB, React)

- Developed a bookstore website using the MERN stack with search functionality for efficient book discovery.
- Engineering REST APIs for managing books, inventory, and orders.
- Integrated frontend components with backend services and database operations.

CRM Software

ReactJs, Spring-Boot, MySQL

- Developed supplier and product management modules using ReactJS and Spring Boot.
- Built REST APIs for supplier details, product records, and order management
- Integrated a MySQL database to improve record management efficiency.

Pizza 24 – Online Pizza Ordering Platform

Django, ReactJs, MongoDB

- Built an online pizza ordering website with menu browsing, cart, and checkout functionality.
- Developed Django REST APIs for menu items and order management integrated with MongoDB.
- Constructed ReactJs frontend with reusable components for menu listing and order summaries.

TECHNICAL SKILLS

Languages: Python

Frontend: HTML, CSS, JavaScript, EJS, React

Database: MongoDB, Mongoose, MySQL

Core CS: Data Structures & Algorithms (Python)

Backend: Django, Node.js, Express.js, Spring Boot

Tools: GitHub, REST APIs, MVC Architecture, Figma, VS Code

CERTIFICATION & LANGUAGES

Certification: Web Development Internship Certificate - SkyBrisk (2026)

Languages: Hindi, English
